

Horse Management

Horse Management is the core of the system and therefore is present in all of StableMate products.

It includes the following features:

- Horse bloodline record
- Horse details record
- Activity history
- Seasonal Mare/foal record
- Vaccination records
- Location details, full tracking and movement history
- Owner details and full ownership history
- Growth charts optional by horse type
- Insurance and valuation details
- Purchaser and vendor details
- Batched Activity input
- Weanling Processing
- Access to all Related Information
- Stallion Breeding Summary
- Multiple Registration details
- Management of Requirements by Hemisphere
